

BFM 2012

For mobile machinery

74,9 - 155 kW | 100 - 208 hp at 2500 min⁻¹ | rpm

EU Stage II / US EPA Tier 2

- Water-cooled 4 and 6-cylinder inline engines with turbocharging and charge air cooling
- The compact engine design and three PTO drive possibilities integrated into the gear drive reduce the installation costs and offer numerous application possibilities.
- Long oil change intervals and easy changing of the engine fluids reduce the running costs and increase the availability of the machinery.

- Best cold starting performance even under extreme conditions.

- Also available with an electronic motor regulator (EMR) to allow easy integration into the electronic device control and monitoring system.
- Low noise emissions due to acoustically optimized components with very smooth running and high durability.
- The robust engine design allows worldwide operation even with high sulphur fuels.
- The engines meet the requirements of the EU Stage II and US EPA Tier 2.

1) Power data without deduction of fan power.

2) Best point consumption refers to diesel with a density of 0.835 kg/dm³ at 15°C.

3) Without starter/alternator, cooler and fluids but with flywheel and flywheel housing.
